

Mobile WiMAX Technology Leader

INFOMARK

■ About Us

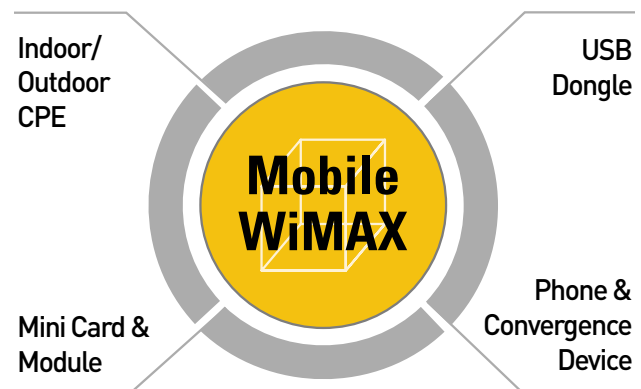

Infomark is a venture company that has held core technologies related to portable mobile communication continuously, developed and supplied a variety of application terminals using such technologies since its establishment in 2002. Especially, we commercialized Mobile WiMAX CPE and Mobile WiMAX & WiFi Dual CPE first in the world and made contribution to setup of standards for WAVE 2 Certification by participating in M2300T-1(MP01, 1A) Validation Program as WiMAX Forum member leading fast changing mobile-communication environment.

Infomark is positioning itself as "Global Mobile Technology Leader" true to its name through advance into the field of 4G mobile communications such as Mobile WiMAX, LTE as well as expansion of market into Japan, Middle East, China, Europe and America in addition to domestic market.

■ Business Field

Major business area of Infomark is Mobile WiMAX. Mobile WiMAX, including WiBro, is key business area based on Infomark's core technologies such as RF and broad band communication technology, and Infomark is holding the entire lineup of products group related to Mobile WiMAX terminals, such as Mobile WiMAX Indoor/Outdoor CPE, convenient Portable Mobile WiMAX & WiFi Dual CPE, Mobile WiMAX & WiFi Dual Module in which WiMAX and WiFi are integrated, and Mobile WiMAX Convergence Device in which Mobile WiMAX USB Dongle and T/S-DMB, GPS Navigation are integrated.

Besides, Infomark is completely prepared for entry into LTE market through current completion of LTE Device Platform development on the basis of accumulated core communication technologies.

Highlighted Features

> Mobile WiMAX & WiFi Dual CPE

IMW-C200W is a product having maximized world's most receive sensitivity for each frequency band as well as solving the problem of RF interference by applying its own technology for eliminating RF interference, which won Best of 4G Awards in the field of Best Mobile Internet Device at 2009 4G World.

Model No. **IMW-C200W**

> Portable Mobile WiMAX & WiFi Dual CPE

When IMW-C600W is left in pocket or bag with its power on in the area where Mobile WiMAX service is available, user can make concurrent connection to many WiFi terminals by using WiFi transmitted by IMW-C600W, so it enables free use of wireless internet in any area.

Model No. **IMW-C600W**

> Mobile WiMAX CPE

Infomark's product group of Mobile WiMAX CPE ensures high mobility and fast data transmission rate as well as design for good portability, which will provide utmost satisfaction to users of Mobile WiMAX Network at SOHO space and home.

Model No. **IMW-C100**

Model No. **IMW-C200**

Model No. **IMW-C300**

> Mobile WiMAX & WiFi Dual Module

Infomark is even possessing world's first product of Mobile WiMAX & WiFi One Chip Module inclusive of WiFi Client function in addition to Mini Card and Module exclusive for Mobile WiMAX in which SD Interface is embedded and MMI is supported. Especially Mobile WiMAX & WiFi One Chip Module will work as most suitable solution for extending already existing various terminals supporting WiFi such as micromini multiple terminal, notebook and netbook to the terminals supporting Mobile WiMAX.

Model No. **IMW-F220**

Model No. **IMW-M220**

> Mobile WiMAX Convergence Device

Infomark's product group of Mobile WiMAX Convergence Device incorporating functions of DMB, WiFi, Navigation, VoIP as well as Mobile WiMAX will provide competitiveness in the field of personal portable terminal for next-generation mobile communication.

Convergence Device Products

Counting with the industry's top class technologies and business know-how in mobile communications and application terminals, Infomark delivers a new value proposition to customers through convergence devices & services.

Owner of the world's first commercialized Mobile Wimax CPE, Infomark always provides the best choice and opportunity to customers for 4G as well as 3G, based on the best technology, accurate market analysis and rapid response.

Despite a relatively short company history, Infomark is emerging as a strong business partner that can lead the world market, with its top class mobile communication R&D and convergence product manufacturing capabilities.
